The most important and unique aspect of horseback riding is the relationship between the rider and the horse. At HUNKAPI Farms we focus on this often-neglected aspect in all of our equine-centered programming. We firmly believe that it’s impossible to interact with a horse and walk away unchanged. The Hunkapi programs all have one aim – to use the bond between horse and human as a catalyst for positive growth in the lives of our participants.

Our participants come from diverse backgrounds, abilities and from as young as 3 years through adulthood. We serve clients with a wide range of diagnoses including, but not limited to: Autism Spectrum Disorder, Attention Deficit Disorder, Oppositional Defiant Disorder, Emotional Disorder, Addiction Disorder, and Post Traumatic Stress Disorder.

**Recovery Month**

Now in its 32nd year, Recovery Month celebrates the gains made by those in recovery, just as we celebrate improvements made by those who are managing other health conditions such as hypertension, diabetes, asthma, and heart disease.

Each September, Recovery Month works to promote and support new evidence-based treatment and recovery practices, the emergence of a strong and proud recovery community, and the dedication of service providers and community members across the nation who make recovery in all its forms possible.

Arizona Women's Recovery Center
RECOVERY for WOMEN
Outpatient Substance Abuse Treatment

Arizona Women's Recovery Center is a non-profit organization dedicated to providing substance abuse treatment to women through a variety of programs to address individual needs. All of AWRC’s programs focus on providing the tools and resources to assist women in living financially independent, drug and alcohol-free lives.

Arizona Women's Recovery Center offers a Women's Outpatient Program and recognizes that recovery for women requires forging a path to independence and empowerment. In addition to dealing with addiction issues, AZWRC's program focuses on the development of life skills, resolution of life issues, creating goals, re-enforcing values and building self-image.

The program was developed on a time frame of at least one year. This allows the women to master skills vital to their recovery, to strengthen a support system, to increase their ability to financially provide for themselves and their children, to practice parenting skills with continued monitoring, to increase self-esteem and to learn to believe in themselves.

Steps to Recovery Homes
Located in Cottonwood, Arizona, is passionate about helping others recover from all addictions while addressing other co-occurring disorders that can act as barriers to living a productive life. Our Wellness programs focus on all aspects of life, not just substance use disorders. Our goal is to guide you through obtaining and maintaining long-term recovery and learning how to live successfully in our world. Steps to Recovery Homes program Life Coaching sessions address all areas usually significantly affected by drug addiction. For example, substance abuse impacts an individual’s finances, relationships, personal boundaries, and getting and keeping employment, to name a few. Therefore, we believe that treatment (or some say drug rehab) should include all the areas of your life that the continued drug use had hindered.

The Importance of Support in Recovery
Lessen your risk for relapse by surrounding yourself with a healthy set of friends and family who support and help you through this new phase in life.

When you do, you’ll find:

• **Facing challenges isn’t as difficult.** When you faced with a challenge, you might become overwhelmed and stressed. These feelings may trigger your unhealthy reaction of drinking or doing drugs. Having people to rely on helps you handle the situation.

• **Friends help lower anxiety.** You might have started using alcohol or drugs to reduce social anxiety, but it took over your life and caused more pain. Having someone with you in social settings helps reduce the stress of being alone or feeling awkward.

• **Family and friends keep you in check.** Sometimes you become too confident in recovery or fall back in old behavior patterns, which increase the risk of relapse. Loved ones provides valuable insight about your behavior and help you address the issues.

• **Having loved ones who support your recovery is a positive thing,** especially when you hit a rough patch. They can empower you to work through the issues that are keeping you down.

• **It feels good to have people who want to be around you and who care for your success.** Their presence and active role in your recovery can boost up confidence and self-esteem that alcohol and drugs chopped down.
